## Experience

**Data Scientist** | **Western Psychiatric Institute and Clinic of UPMC** |
March 2018 - June 2018 | Pittsburgh, PA

- Identified sleep-wake patterns for various studies of circadian rhythm
- Devised, optimized and automated prediction algorithm with 94% success rate
- Predicted patients mental state with Python (Scikit-learn, NumPy, SciPy)
- Employed best statistical techniques to process large data sets, ranked 1st in Philips Grand Challenge

**Software Engineer** | **Department of RST, University of Pittsburgh** |
February 2018 - May 2018 | Pittsburgh, PA

- Developed an Android app and Windows dashboard, Project ranked 1st in Pitt Innovation Challenge
- Created Bluetooth 4.0 Low Energy C# programs saving more than 50% coding size
- Developed programs to analyze gait movements at real-time
- Assisted with agile development with milestone tracking

**Application Developer** | **UPMC** |
September 2017 - December 2017 | Pittsburgh, PA

- Implemented NurseTrac mobile app for iOS and Android including a Web Portal
- Designed dynamic Web 2.0 UI compatible interface and MySQL Database
- Devised AJAX fast login system
- Integrated with Amazon AWS with Nginx for URL redirects

## Projects

- College Admission Portal using MEAN stack and Restaurant API in Flask
- House Price Prediction using Advanced Regression Techniques in Iowa State reality market
- Get answers to intricate baseball questions in 3 part series using Relational Database and Machine learning with visualizations
- Machine Learning in
    - Titanic Machine Learning from Disaster competition hosted at Kaggle
    - Iris Dataset Supervised Learning and Unsupervised Learning
    - Congressional Dataset Supervised Learning and Unsupervised Learning

## Education

**University of Pittsburgh** | Master of Science | Information Science
May 2019 | Pittsburgh, PA
